

**GDCTOOLS introduces the**

# GDCenter Finder

Finally a center tool that works!

*~Works on all common trade sizes  
1/2"-4" EMT, RMC, IMC,  
PVC SCH40 & 80*

*~In test, average installation time and  
errors were cut in half.*

*~Bubble level and cross hair locate  
true center of conduit.*

*~Employs common installation habits  
and practices.*

*~Notched back allows closer  
measurements from obstructions*

*~Compact and sturdy design.  
throw it in your tool box and forget  
it.*

*~ Electricians, Fitters, Millwrights  
and Plumbers can all benefit from  
the simplistic design.*

*~Tight tolerances for exacting  
measurements.*

*~Simplistic tool for a complex  
industry*

The GDCenter Finder provides a simplified means to find the exact center of any common trade size conduit. Using X and Y coordinates this tool aids in the transposition of conduit center to any enclosure, panel or junction box. Layout has never been easier.

The GDCenter Finder is a new patent pending product that revolutionizes the installation of electrical panels and junction boxes. No need to learn a new installation process. Pull your lay out just as you always have, but this time aided with the GDCenter Finder. Your center point will always be level and clearly identified. The days of "close enough" are over. Finally a center tool that works!
